

Wilson Pleased With Ohio Bipartisan Job Stimulus Awards for Advanced Energy

Upon learning that a clean coal power plant to be built along the Ohio River in Meigs County was selected to receive one of the first funding awards from the Ohio Bipartisan Job Stimulus Plan, Congressman Charlie Wilson (OH-6) issued the following statement:

"As we work to turn our economy around and to create jobs, we can also work toward another major national goal: energy independence. I'm so proud that one of the first winners of the advanced energy portion of the Ohio Bipartisan Job Stimulus Plan is in my district. AMP-Ohio represents the future of clean coal, jobs for an area that needs them and electric power for numerous Ohio communities. This is a win-win for the state and for Ohio's Sixth Congressional District. I also want to thank the Governor for his foresight and for his support of jobs for our community."
